Please submit your training fee of \$20.00 to the Reno County Extension Office. Make checks payable to the Reno County Extension. No online payment option is available.

A minimum of 10 registered participants are required to hold the train-the-trainer experience. The experience will be capped at 30 participants.

Better Brains for Babies:

The mission of the Better Brains for Babies initiative is to improve the potential of young children by promoting the use of early brain development research in everyday life experiences. Better Brains for Babies is a collaboration of national, state and local, public and private organizations dedicated to promoting awareness and education about the importance of early brain development in the healthy growth and development of infants and young children. The initiative began in Georgia, and has become available to Kansas professionals through a partnership between University of Georgia Extension and K-State Research and Extension.

Train-the-trainer participants will learn about brain development, adult-child interactions, toxic stress, and other elements of young child development. After completing the training, attendees will be eligible to disseminate information on early brain development throughout their communities. The Better Brains for Babies curriculum is a tool which provides a clear and consistent science-based message about the impact of early brain development on children's overall growth and development. To learn more, visit www.bbbgeorgia.org.
