

NRCS and the Reno County Conservation District are seeking the help of Master Naturalists to help evaluate CRP contracts. This would involve driving to the site and looking for certain plant species. RCD will provide training. They would like to get on this ASAP and you could easily get your 30 hours in within a short period of time. If you are interested, please contact Robert Wimer at (620) 669-8161, punch in #3 or email him at Robert.Wimer@ks.usda.gov
